

Fiber+ cable

This Fiber+ cable of the HiDiamond, is once again a plan from the relationship quality/exceptional price, obviously its opened, deep sound and luminous it is not sure fruit of the case, assembled in pure glass fiber (nothing quartz or plastic), can be verified its highest quality to emanation of the light through of connection. Tried or in within hi-end, than in within Home Theatre, it has always maintained its characteristics peculiar that indeed render it a cable to advise box it to sluce, to confirm the fact that is possible to order it in any length a characteristic available with many cables of this magnificent Italian company that they give big international to our production hi-end. The list price for 1 meter is of 33 euros, than considering it I confirm the quality of the product is wonderful .

Cables for small bridge : Bridge +

In these weeks the new ones small bridge for diffusers are entrances in commerce, from Bridge+ name. Always numerous the diffusers that allow a biwiring, often unfortunately are supplied of series with of the thin bars of metal, that they have a very bad influence on the sound. HiDiamond has decided to make of the small bridge that they go to replace these last ones, for to give the maximum performance to the system. In preview we have been able to taste this new product, where we find a quality constructive excellent (but of this of I was sure knowing HiDiamond), completed with of the quality staples. The utilization the copper is same of that one used for cables constructed from HiDiamond, and the exclusive technology is used 4VRC (four times cooked copper). You will be able to find greater information on the www.hidiamond.it site, and is from little is on linens an interesting called folder, the cable bibliography http://www.hidiamond.it/The-Cable-Bibiography_2071759.html where you will be able to discover like makes an audio cable and video. length of the Bridge+ is of 10 cm standards, but various lengths can be demanded. We come to the test: I have listened to mine before disc test puts into effect them preferred: Tsuyoshi Yamamoto Trio " What to wonderful Trio! " with the small bridge in brass that I had, and then I have inserted the Bridge+ of the HiDiamond. That to say, draft of small things, but high fidelity is made of this, the stage was higher, instruments mainly defined, l' wider image and above all the choral impact more plastic, the more alive, more real. We come to the price. E' fixed to 45 euros for two braces of small bridge, once again me ducking to the seriousness, the honesty of this Italian house, if they had decided a price a lot, but the much highest one, already would have been a transaction, but thus they are given.

Great, great HiDiamond. I inform to you moreover that if you want, and if acquired a cable of HiDiamond power, you can demand the same ones small bridge of the acquired cable, a plus in more for a company that they give very important to our panorama hi-end also all' foreign country. For any information you can by telephone contact HiDiamond through the www.hidiamond.it site or to numbers 0687907305
